FACT OR FAKE?

Cut out the cards. Read one out loud. Everyone shouts FACT or FAKE! Check the answers at morichesbaypress.com/rocco

1

T. rex could chew up huge bones to get the marrow inside.

2

T. rex and Stegosaurus lived at the same time.

3

The real Velociraptor was about the size of a turkey.

4

Mosasaurs were giant sea dinosaurs.

5

A Triceratops had hundreds of teeth packed into its jaws.

6

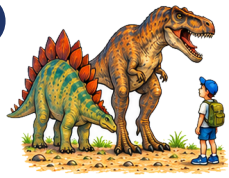

Pterosaurs were flying dinosaurs.

7

Each pterosaur wing was held up by just 1 finger.

8

Dinosaurs and people lived at the same time.

9

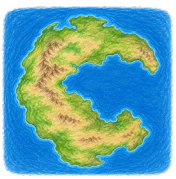

Some ichthyosaur eyes were about 10 inches across.

10

The Age of Dinosaurs lasted only about 1 million years.

11

In the Triassic, all of Earth's land was one giant continent.

12

Velociraptor was taller than a grown-up person.

13

A Patagotitan needed about 2,000 pounds of plants a day.

14

All dinosaurs died out 66 million years ago.

15

The Chicxulub crater in Mexico is about 112 miles wide.

16

People dug up a Mosasaurus skull before the word “dinosaur” existed.

DINO SIZE-UP: WALK IT OUT!

Go outside with a grown-up. One big kid step is about 2 feet. Walk it out and see how big they really were!

	Who	How big	About how many big steps	Your guess	Your count
	**Patagotitan skeleton cast**	122 feet long	about 61 steps		
	**Quetzalcoatlus wingspan**	about 33 feet	about 17 steps		
	**Triceratops skull**	about 7 feet long	about 4 steps		
	**Velociraptor**	about 6 feet long	about 3 steps		
	**Ichthyosaur eye**	about 10 inches across	**smaller than one step: draw it!**		

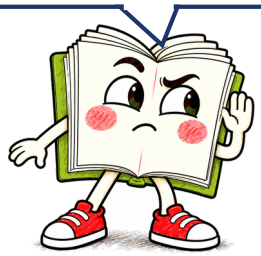

How many YOU long is a Patagotitan?

My height: _____ feet

122 ÷ my height = _____ of me!

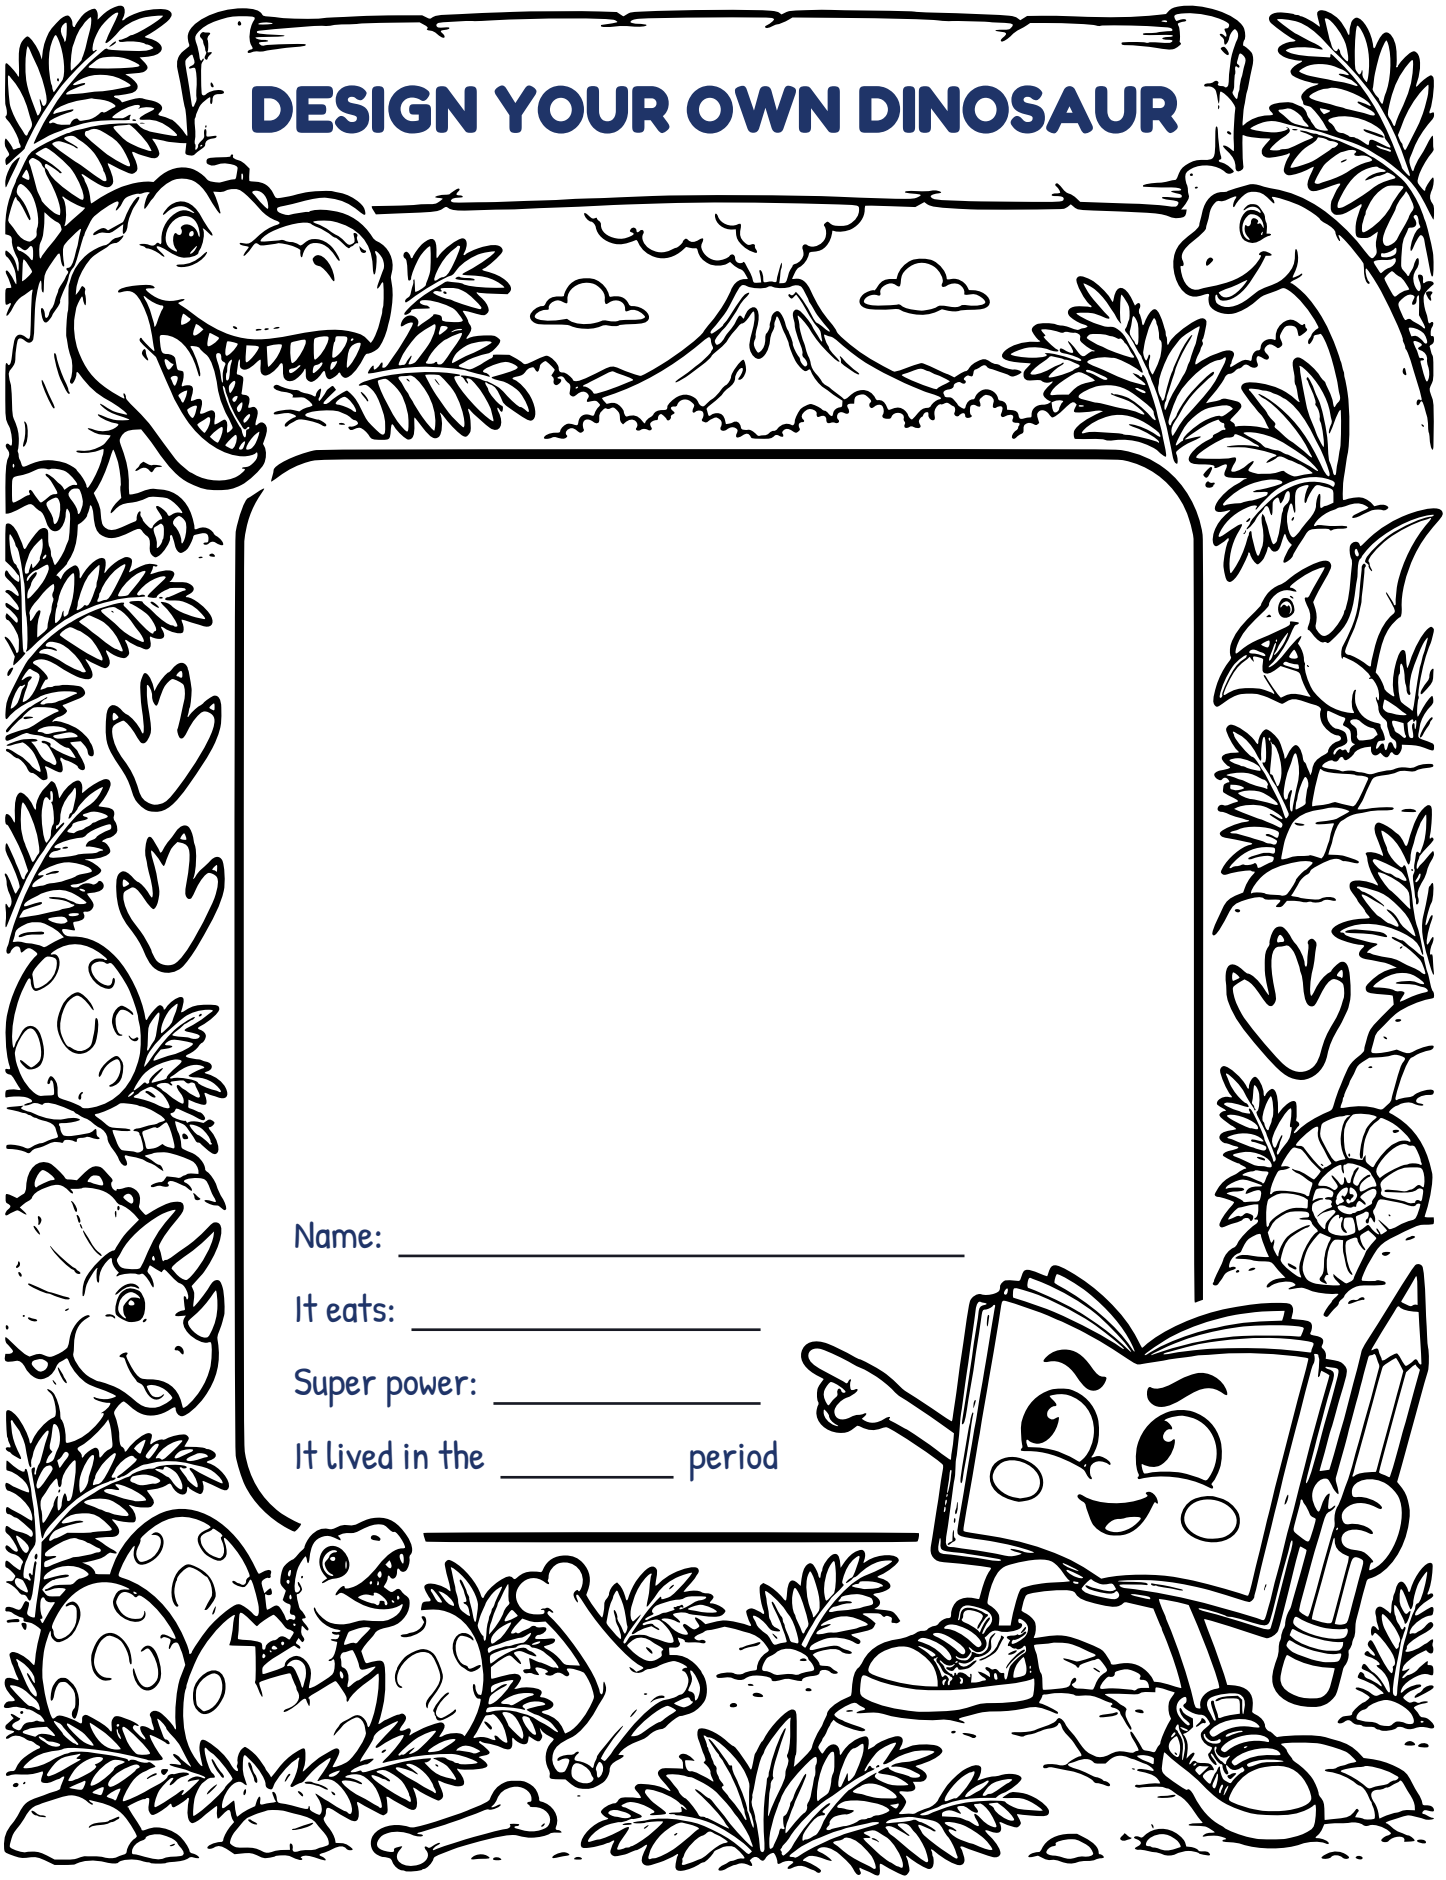

Tip: a grown-up can help with the dividing.

Try not to think about a 122-foot dinosaur in your yard. Too late.
